

```

In[0]:= (* P(G1) and P(G1a), under the IM model for 3 sequences (a1, a2, b) for heuristic species delimitation.
The notation is from Kornai et al. (2024).
PG1a works if M>0 only. PG1aInt works if M is specified with high precision,
such as M = 10^100.

*)
